## PROJECT WORK

---

### FitTrack - Fitness Tracker (2026):

Developed a scalable AI-powered health monitoring system using **React.js**, **Tailwind CSS** and **Strapi** (Headless CMS). Integrated Google Gemini API for automated food recognition and calorie tracking, featuring a responsive dashboard for real-time health insights and secure data management via PostgreSQL/SQLite.

### Food Delivery Website (2025):

Built a MERN stack (**React.js**, **Node.js**, **Express.js**, **MongoDB**) based Food Delivery Web App with user authentication, explore food items, add products to cart, place online orders seamlessly and admin dashboard supporting full CRUD operations.

### Auto Reply Chatbot (2025):

Created a **Python** based AI-Auto Reply Chatbot that calculates chat screen coordinates through cursor dragging, intelligently analyzes user conversations in real-time, and generates context-aware automated responses using AI.

### Portfolio Website (2025):

Developed a personal portfolio using **HTML**, **CSS**, and **JavaScript** to showcase projects, skills, and achievements. Features a responsive design, interactive elements, and smooth navigation.
